EDUCATION

2024
Certified solution architect
DEVOPS SOLUTIONS ARCHITECT
in Kernelios college

2019 – 2020
High School Diploma with a focus on **Computer Science**

SKILLS

- **Programming Languages:**
  HTML, CSS, JavaScript (Node.js), Python, C#

- **Containerization:**
  Docker, ECS, EKS

- **Database Management:**
  SQL, MongoDB, PostgreSQL DynamoDB

- **Operating Systems:**
  Linux environments, Windows

- **Cloud Services:**
  AWS

- **Projects**
  HTML, CSS, JS:
  BMW website Project
  Calculator project
  GitHub Repos

Profile Summary:

Highly motivated and technically skilled individual with a solid computer science and web development foundations through high school education. Proficient in a diverse array of programming languages and technologies, including HTML, CSS, JavaScript, Node.js, Python, SQL, MongoDB, Docker, Linux administration, networking fundamentals, and AWS cloud services. Known for exceptional problem-solving abilities and a passion for creating efficient solutions through innovative coding practices. Possesses strong communication skills, adept at conveying complex technical concepts to diverse audiences. Proven ability to adapt quickly to new technologies and environments, contributing effectively to team success while driving personal growth.

Projects:

- Developed interactive web applications using HTML, CSS, JavaScript, and backend technologies.

- Implemented RESTful APIs for seamless communication between frontend and backend.

- Utilized databases such as SQL (MySQL/PostgreSQL) and NoSQL (MongoDB) for efficient data storage and retrieval.

- Deployed applications on AWS, leveraging Docker containers for scalability and consistency.

- Created serverless applications leveraging AWS Lambda, DynamoDB, API Gateway, and other managed services for scalable and cost-efficient architectures.

- Deploying CI/CD automation with Terraform and CloudFormation.

- Finale project during the course which includes CI/CD automation with Terraform, CodeBuild using Github, addition of a MongoDB to the deployment, Grafana/Prometheus
- to create a dashboard for cluster monitoring. the final product was creating a Pacman game using all those services.
